MP3 Players

Sound quality and ease-of-use are, apart from storage capacity (firmly integrated or variable via memory card), design and workmanship, one of the most important MP3 player criteria. Convincing connection possibilities (e.g. in a vehicle, hifi stationary), powerful headphones, trendy cases and accessories, etc. delight MP3 fans all over the world.

Player Cases, device-specific

The iPod family is confronted with more and more competition. More and more manufacturers develop excellent players and have larger market shares. It is recommendable to use made-to-measure cases in order to ensure optimum protection of new products during transport. Cases with the appropriate openings enable you to operate the player in the case.

Player Cases, universal

A case is more or less compulsory if you want to protect your MP3 player - especially if the devices have a video display. Of course, the external appearance depends on your taste. We offer high-quality/classic as well as youthful/trendy models. You should pay attention to the workmanship and to practical features. Models with openings allow the devices to be operated in the case.

Decoration

"Deko-Den" is MP3 cult made in Japan. The optical refinement of a player with stickers or colours is also called "blingen" in Europe. Similar to a virus, it has attacked all players (and owners). The only way to alleviate the symptoms: decoration of the player with glitter and colours.

Radio Adapters

MP3 players are more and more often used to store private music data. It's very comfortable when MP3 files can be played back on hifi systems, car radios or headphones via radio or Bluetooth.

Only CDs lose out and get dusty as they are, strictly speaking, no longer necessary.

Chargers

Sometime or other, the power of the most efficient MP3 players and iPods is exhausted. Colourfast displays and other additional functions are certainly great features which, however, often consume much power. No problem, if you have an appropriate charger (vehicle, USB, MP3 specific or for round cells).

Charging Cables/Mains Leads

No current - no music! It is very recommendable to have an appropriate charging cable at hand (for the car's electrical system and the mains) in order to ensure permanent power supply.

The charging cables are optimally suited as second or replacement cable and mostly have specific MP3 plugs.
